

# HEAVY EQUIPMENT OPERATOR

**WBF**

WOMEN BUILDING FUTURES

SHE WORKS

## Heavy Equipment Operator

This 17-week comprehensive program, offered in partnership with Olds College, will prepare you for a career as a heavy equipment operator. You will graduate with a certificate from Olds College and a Women Building Futures Certificate, which includes seven safety certificates plus preparation for the heavy equipment operator's workplace.

You will learn about soil properties and soil reclamation techniques, grading, excavation math and blueprint reading. You will come away with an understanding of the operator's responsibilities and basic preventative maintenance procedures for six types of equipment. You will be exposed to earthmoving processes and you will run loaders, rollers, scrapers, graders, dozers and excavators.

At the end of the course, your training will be put to work on a 2-week practicum. Apply your skills in an industry environment, with a contractor, working in the road building industry, the logging industry, for public works or in other areas that interest you.
